

AUTONOMOUS ROBOTIC SECURITY

What's changed on your perimeter since the last patrol?

A damaged fence. A ladder against the boundary.
An unexpected vehicle. An object that wasn't there
before.

See the potential of a different kind of patrol.

1ROLLO prototype shown

Autonomous patrol. Intelligent awareness. Real-time alerts.

Meet 1ROLLO: an autonomous security robot designed to patrol your site, extend visibility beyond fixed cameras and give your security team a clearer picture.

INTELLIGENT AWARENESS. ACTIONABLE INFORMATION.

1ROLLO is designed to monitor its surroundings, identify anomalies and send real-time alerts for investigation.

Potential applications include fence damage, ladders against boundaries, newly left objects, unexpected people and nearby vehicles.

Demonstration capabilities will be agreed for your site in advance.

SEE THE POTENTIAL ON YOUR OWN SITE

One day. Your site. No trial fee.

A complimentary, fully supervised one-day demonstration this November 2026. Discover where autonomous patrol could strengthen your coverage and make your security budget go further. No purchase obligation.
